Rostrly

Shift scheduling that retail chains in the Gulf actually use

Series A · 2026

Riyadh · Founded 2022

The problem

- Store managers spend 6 to 8 hours a week building rosters in spreadsheets
- Saudization quotas and labour rules change often
- Overtime and no-shows go unnoticed until payroll

Product

- Rosters built in minutes from forecasted footfall
- Labour rule and Saudization checks before a roster is published
- Mobile app for staff in Arabic, English, Hindi and Tagalog

Traction

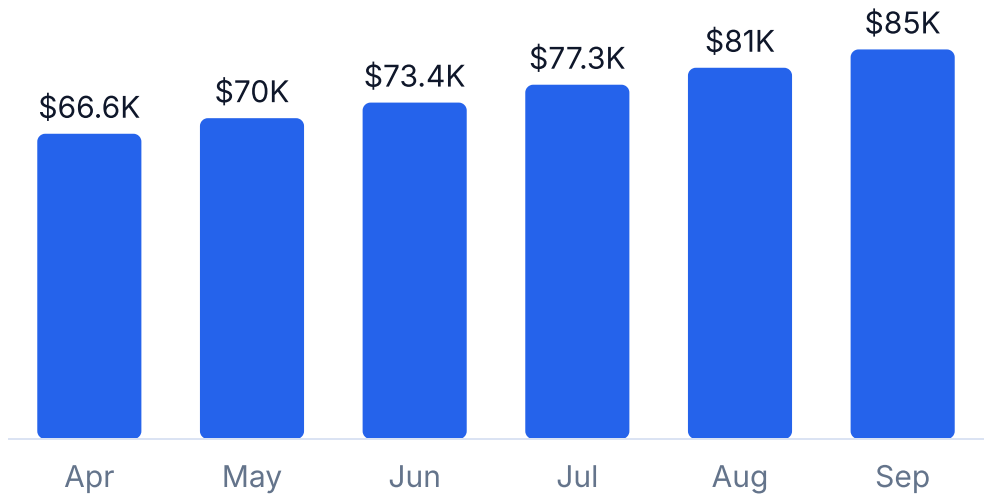

$85K
MRR (Sep 2026)

$1.4M

retail chains

5%
month-on-month growth

MRR, $ thousand

Market

$1.1B yearly workforce software spend across GCC retail and hospitality.

- 14,000 chains with 10+ stores
- Average contract value today: $22,000 a year

Competition

	Saudization checks	Arabic-first	Retail forecasting
