Sunroof Grid

Rooftop solar for housing societies, with no money down

Seed round · 2026

Ahmedabad, India

Why societies don't go solar

- A 100 kW rooftop system costs ₹45 lakh up front
- Committees change every year and can't agree on a loan
- Nobody owns maintenance after installation

Our model

- We install, own and maintain the system
- The society pays a fixed monthly fee, 20% below its old common-area power bill
- Ownership passes to the society after 7 years

Where we are

Founded 2019
7 years in rooftop solar

120
housing societies financed

₹18 L
monthly recurring revenue, Sep 2026

6%
monthly growth

Market

India has 1.2 lakh large housing societies in its top 15 cities.

- Each needs 50 to 200 kW of rooftop solar
- A ₹27,000 Cr financing opportunity

Team

KP

Karan Patel

CEO

Project Lead, Helios Power Systems (2015–2023)
Delivered 400+ rooftop projects

DS

Divya Shah

CFO

Associate Director, Greenbridge Capital (2017–2023)
Structured clean energy debt

A 45-member team of engineers, installers and sales

The raise

$1.8M Seed equity, plus a debt line for systems

- Equity: team, sales and software
- Debt: the solar systems themselves

₹4.5 Cr
cash

₹30 L
monthly burn

15 months
runway
